

ekuore[®] Digital Stethoscope

Features:

- Transmits Auscultation to Cell Phones And Speakers
- Records the Auscultation
- Displays Phonogram on Cell Phones
- Adjustable Volume
- Heart & Lung Filters

Benefits:

- Share Auscultation with Client
- Share Phonogram with Clients
- Save Auscultations and Phonograms and Send to Specialists if Needed
- Use with Ear Plugs/Headphones for Hearing Impaired

The eKuore[®] Vet II is an electronic veterinary stethoscope with the ability to transmit the auscultation to smartphones, tablets, speakers, ear plugs and headphones. This unique device amplifies the auscultation sounds 20 times allowing the user to share the heart beat sound along with the corresponding phonogram with their clients. It's also excellent to use with ear plugs or headphones for hearing impaired clinicians.

The recorded auscultation and phonogram can be stored in the patient record or sent to specialists for further interpretation. The eKuore is available in a Client Education package that includes the Ekoure Basic Electronic Stethoscope, a Wireless Transmitter and a Bluetooth Speaker. This package allows for direct transmission of the sound to the Bluetooth speaker without the use of a cell phone for optimal clarity. It can also interface with a cell phone to see the Phonogram by downloading the included Application. The Premium Package includes the eKuore Basic Electronic Stethoscope, Ear Plugs, Headphones and a Speaker and is optimal for Hearing Impaired Clinicians.

This innovative stethoscope meets the needs of Veterinary Clinicians that either want to share the auscultation with their clients or that need a little extra amplification for hearing impairment or both!
